

The American Iris Society

News & Notes - Fall 2018

News & Notes has continued to be published on a regular monthly basis and again the most popular edition was the Special Edition announcing the AIS Medal Awards. It was both the most read and had the most followed link.

Past issues of News & Notes are now online in the [American Iris Society Hager-DuBose Memorial Online Library](#). Thank you to the Board for approving their addition and to Bob Pries for creating and expanding this resource. You can find links to the individual issues from this page:

<http://wiki.irises.org/Hist/NewsAndNotes>

Note that the links in individual issues work; however, as with anything on the Internet, they may point to resources that are no longer there.

News & Notes has proved to be a popular benefit for members. Now we would like to create something different to attract non-AIS members which would be published less frequently. This would have news from AIS and other sources combined with a soft-sell to becoming an AIS member. For the first experiment, I plan to start with the non-AIS members from individual clubs or Sections. Does your club or section have non-AIS members and email addresses for them? Volunteer clubs and Sections gladly accepted; please contact me. Topic suggestions for this endeavor would also be much appreciated.

Thank you for all the great suggestions for topics to include in News & Notes. Please keep them coming!

What else can we do to help you?
