Website Issue: High Memory Usage On Our Server

You currently have the VPS Mercury Managed, which gives you:

- 4 CPU cores
- 2 GB RAM
- 60 GB SSD disk storage
- 1 TB Bandwidth
- 60 GB VPS Backup Redundancy
- 3-year current term cost: \$2,303.64.

The next package up doubles your RAM and gives you the following specs:

VPS Venus Managed:

- 4 CPU cored
- 4 GB RAM
- 125 GB SSD disk storage
- 2 TB Bandwidth
- 125 GB VPS Backup Redundancy
- 3-year cost: \$4,643.64

We will also credit you the remainder of your current VPS Mercury plan, and apply it towards the VPS Venus upgrade, so that you only pay the difference.

Credits: \$1,417.95.
Difference due: \$3,225.69

The difference due will start a new 3-year term upon approving the upgrade, up until the next 3-year period expires.
