

Report of the Registrar-Recorder and Registrations Committee

26 Apr 2021

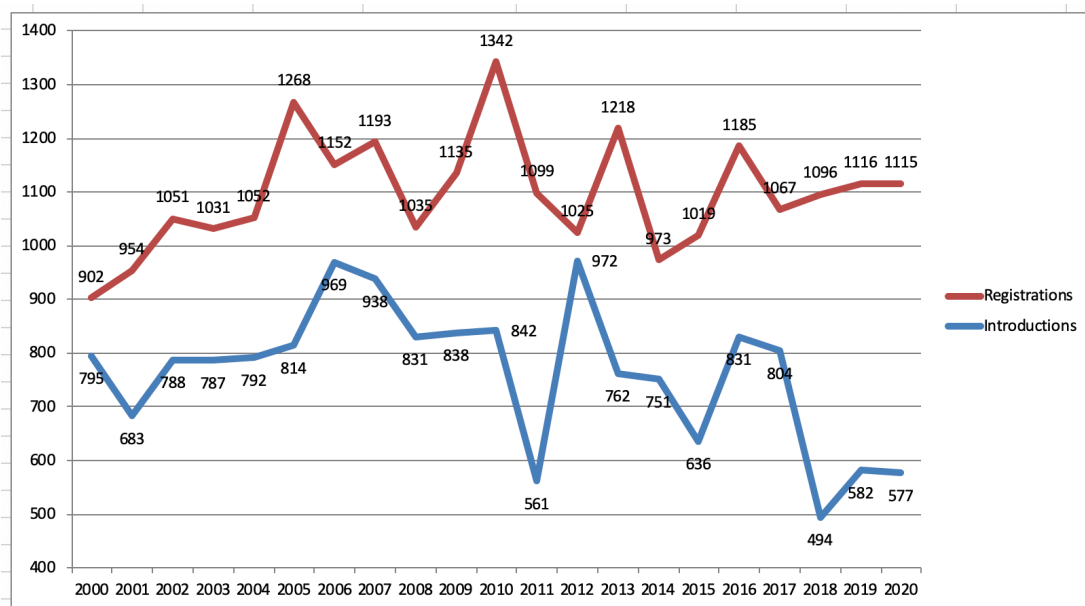

Registrar-Recorders — John Jones & Joanne Prass-Jones

Assistant Registrar — Janis Shackelford

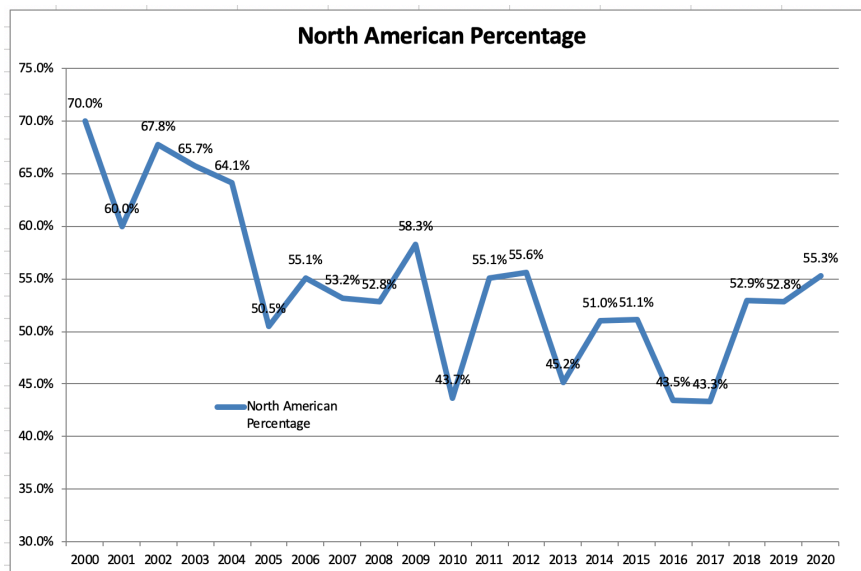

2020 Registrations and Introductions

The 2020 Registrations and Introductions booklet was ordered for the AIS Storefront on April 26, 2021 delivery approximately May,11, 2021

Registrations and Introduction Counts from 2000 to 2020

North American percentage from 2000 to 2020

North American registrations as a percentage of total annual registrations.

Of the 1115 new registrations, 51.4% are tall bearded, 35.9% other bearded types, and 12.7% beardless and species or species hybrids. Totals by class are as follows:

574	Tall Bearded (TB)	51.4%	18	Siberian (SIB)	1.6%
226	Standard Dwarf Bearded (SDB)	20.3%	17	Japanese (JI)	1.5%
73	Louisiana (LA)	6.5%	17	Spuria (SPU)	1.5%
49	Intermediate Bearded (IB)	4.4%	13	Arilbred (AB)	1.2%
49	Miniature Tall Bearded (MTB)	4.4%	8	Pacific Coast Native (CA)	0.7%
32	Miniature Dwarf Bearded (MDB)	2.9%	5	Species Hybrid (SPEC-X)	0.4%
31	Border Bearded (BB)	2.8%	4	Species (SPEC)	0.4%

In addition, introductory data is included for 577 varieties including: 25 introduced in 2019, none of which were previously included in an annual Registrations and Introductions publication.

Previous R&I s

Print On Demand continues to work well for printing copies of our publications.

Reserved and Registered Names

On a recurring basis throughout the year a PDF of the then current list of registered and reserved names is being published on the AIS website to better enable hybridizers/registrants to verify that a name they would like to have is not in conflict with a previously approved name. A list of all names registered and reserved in 2020 is currently on the website.

Assistant Registrar/Recorder

Janis Shackelford is being trained in as Assistant Registrar/Recorder and will eventually (within the current year) assume the role of Registrar/Recorder. John Jones and Joanne Prass-Jones will continue to assist her after she assumes full duties.

Sharing the Registrar/Recorder Work Load

John is doing some redesign work on the annual R&I database architecture to enable the workload to be shared by several people. It should be noted that one person (the appointed ICRA) must be responsible for the tasks as lined out by the ISHS ICRA the primary task of which is approving requested names. This task also includes creating the original new database record for each name and verifying/tracking/managing payments for registering or reserving names. Entering descriptions and parentage information will be done by others as that is generally outside the scope of the ISHS requirements.

Registrations and Introductions booklet Appendix

The AIS Board has decided that beginning in 2022 what was referred to as the R&I appendix will now be published as an Excel file on the AIS website.

Associate Registrars

Stephanie Boot has retired as New Zealand Associate Registrar. NZIS has appointed Lyn Chappell as the new Associate Registrar.

E Check List (the official AIS electronic registry of the Registrar-Recorders)

Irisregister will soon be updated with the 2020 R&I information and the current reserved names

Registration Images

The requirement for registrants to provide high quality images of the registered iris has added significantly to the Registrars' work load in support of the Image Coordinator. It will also require significant effort to integrate images into, and the concomitant effort to redesign the Registrars' annual database, the master database, and the online database, irisregister.com, to accommodate and display the images. Nothing has been started in this respect
