Policy Report Spring 2005

I am back as Policy Chairman, at least temporarily. I have been somewhat unhappy with the format presently in use for distributing policy (AIS Board minutes from 1987 to current, concatenated, burned to a CD and distributed to Board members). I am bringing the database of policy decisions (motions and 'by consensus') up to date and will run both the database and 'compiled minutes' concurrently although the distribution of paper copies of the database format has become too cumbersome to continue.

I believe that posting policy to a webpage will be the most practical solution of expanding size of the policy document and solve the distribution problems. As always I will respond to letters and phone calls from those individuals who do not use a computer or email.
