American Iris Society Slide Report

The past 12 months have been busy with the slide program. There has been a problem getting the programs back in time to ship them out for the next group to use for their program. There were a few requests that needed their programs in three to four days and that was a close call.

THE IRIS FAMILY was the most popular slide set requested and there are only four sets of it, and they were out most of the time. The CONVENTIONS, BEARDED IRIS, BEARDLESS IRIS are the most popular.

There were several requests from society members that needed programs to show at other flower and garden groups. They all paid rent on the slides programs and were shown to multiple groups. When sending out programs I included *INVITATIONS TO JOIN* in case they can get prospective new members to join A.I.S.----- and it has worked a lot of the times.

We have sold quite a few CD programs. We just sent four CD programs to a member in Spain who has a large Iris farm where she sells a lot of irises. We are having problems reproducing the CDs and they need to be updated.
