

BULLETIN REPORT, spring 2008
Terry Aitken

Bulletins appear to be running on budget for the year. Eliminating or abbreviating Biographies has freed up a great deal of space for more topics of interest to the members. I received far more feedback from the January Bulletin than ever before and all of it was positive. There were a few corrections.

While investigating the purchase of a new scanner, it appears that there would be a need to upgrade many programs on the AIS computer at a considerable cost over and above the cost of the scanner. I decided to send the scanner back to Nikon for repair for a lesser amount than the cost of a new one. At this point, I am working with the Nikon tech. support to get the auto focus operating properly. I will make a test run on newly scanned pictures shortly.
