

## Exhibition Report

I appreciate the ability to assist in this important position. It has been an interesting transition. The challenges have been having the information in the January bulletin being incorrect which caused a lot of confusion for all of the Regions as to where to submit their show schedules. That has since been corrected in the April bulletin and I appreciate everyone's hard work to helping me get that corrected.

There were delays in the forwarding of the show schedules because of the incorrect information, sometimes with the forwarded show schedules getting to me 2-4 weeks after the show schedules were sent out, or longer. There were several show schedules that I had to be very creative on how to get the ribbons and rosettes out to the show chairs in time for their shows. One show, because I did not get their order and I had to fill it the week of their show did not receive their ribbons and rosettes until the day of their show. A couple of shows I have had to overnight FedEx their rosette and ribbons because their initial orders were not received.

I have had to place a second order for blue and white ribbons, due to the high demand for ribbons for the April shows to make sure that the remainder of the shows I would be able to meet the orders.

The certificates, I apologize were not up to the AIS standard for the 120 shows that were initially sent out and all 120 shows will be getting new certificates to have them redistributed. I have been working with E. Roy Epperson in regards to this issue.

I appreciate everyone's time, patience, and considerable help during my transition.
