

Publication Committee  
Fall 2010 Report

Another short report. If it wasn't for Terry Aitken's hard work on the hybridizer's manual, it would be shorter still.

Our first priority is getting more help, and a clear definition of the projects we need to tackle. Just listing the titles is pretty overwhelming for anyone to volunteer. Over the winter we will be attempting to break the work down into manageable pieces. Any ideas are welcome.

Hybridizers Manual

Terry has been making steady progress on this. We are still looking at a 2011 publication date.

Compendium of Bulletin articles on hybridizing

Delayed for health reasons. We are trying to find help to complete this project.

Projects that need attention:

Hager Chronicles

Centennial publication

Respectfully submitted,

Jody Nolin
