

American Iris Society
Publications Committee Report
Spring 2010

Our basic message this year is HELP! We need volunteers to bring our current projects to completion. . Health issues and conflicting commitments had delayed progress so far this year.

Maureen and I will be drafting an article for the bulletin describing the projects, time commitment and skills we need to match.

PROJECTS

Hybridizers manual – This is a work in progress. Terry has been working diligently on pulling this together. Looking for some assistance on Spuria, Siberians ,Louisiana and PCIs.

Compendium of Bulletin articles on hybridizing – This has been held up for health reasons. The committee will be seeking volunteers to assist.

Basic Iris Culture booklet – We have an urgent need for this! The current booklet is not at Roy's printers and no digital file can be found. The current inventory may not last a full year. The committee believes it should be updated while we are in the process of re-creating it. We will be seeking volunteers to work with Bob on this.

Chronicles – this is an other area that desperately needs attention.

Respectfully submitted,

Jody Nolin
Maureen Mark
Terry Aiken
Betty Roberts
Bob Pries
