

**Image Coordinator
Spring 2013
Janet Smith**

Information continues to be sent out to the hybridizers registering their iris. Some hybridizer introductions have been received but not at the rate expected. AIS Digital Programs appears to have better luck and more cooperation in obtaining introduction photos and has since 2005.

FOR CONSIDERATION: Why have an Image Coordinator if there appears to be reluctance from abroad as well as USA. Use the form but have them sent to the AIS Digital Programs-Slides Coordinator – hybridizers are very cooperative and already send all newly acquired photos. They like the feeling their photos are being used in education and it is free advertising for them!

There is already an agreement set in place to share all acquired photos with Wiki, Library, HIPS and anyone else who asks.

Respectfully,
Janet Smith, Coordinator
