

Library Ad hoc committee Report

There has been little going on with this committee. I have had a major shift in both my professional life and personal in the last 7 months. Dave Silverberg who was supposed to act as the information liaison has had some problems which made it virtually impossible to have consistent contact. During a drought period Dave's well also went dry and he has been hauling water day and night to keep things going. The only major change has been the acquisition of a new hard drive for the library. Everything else has remained status quo with the receiving of news letters, bulletins, and articles.

Respectfully yours
Ronald Cosner
