

AIS RESEARCH LIBRARY REPORT

SPRING 2015

The normal quantity of Regional, Section, Local Bulletins and Newsletters have been received, record- ed and placed on file.

Work continues on trying to find place for much of the Cooley slides. There are about thirty (30) 3" folders filled with 5 x 7 color slides of many iris varieties. My choice would be to discard all but two (2) of each variety so that space requirement would be reduced by about 65%. This problem is also true of many of the slides in the Hager collection. Case in point....there are 30 plus slides of the same pose of 'Beverly Sills.'

There have been three (3) requests for assistance. Two from society members and a third from President Jim Morris to assist Katharine Cook, daughter of Dr. Franklin Cook. I have not heard back from the society members (after I had requested additional info) and I have not been contacted by Ms. Cook.

Respectfully Submitted,

Dave Silverberg
AIS Librarian
