

Display Garden and Test Garden Committee Report
Chairman George Boyce, Glenara Gardens, PA

A new committee attempted to solve an old problem of "approved" Display Gardens.

The approved gardens will be listed on the AIS website. Applications for review and approval are on

the website. Applications are to be sent to me to begin the process for review and consideration. Wherever possible, I am soliciting the RVP's to visit the gardens who apply and offer comments. Photos are most welcome and helpful from the applicants.

A review of the gardens will be required every 3 years and they must be open to the public during iris bloom time.

It is hoped that our affiliate iris groups will use the AIS listing for their display gardens system. I will be attending as many of their meetings as possible over the next few days urging them to do so.

A committee for the Test Garden regulations is being formed and will hopefully have a report soon
