

Motion Request #4

That the AIS Storefront be directed to reduce the inventory of 1939 through 1999 checklists to 1,000 books by the end of the fiscal year, September 30, 2016.

Explanation

The inventory of these checklists is 5,394 as of the April 1st inventory provided by John and Kay Ludi operating the AIS Storefront. The books are not selling and the rent on two storage units now exceeds \$3,000 per year. The significance reduction in unsaleable inventory is intended to make it feasible to only need one storage unit for the next fiscal year.

Implementation

The selection of which volumes to keep and in what number is left to the AIS Storefront while noting that 100 each for the years 1939 through 1989 plus 400 for 1999 would satisfy the requirements of this motion.
