

**A.I.S. RESEARCH LIBRARY REPORT**

**FALL 2017**

The normal quantity of Regional, Section, Local Bulletins and Newsletters have been received, recorded and filed.

I was able to fill requests for information from Kathy Egerer, President, HIPS and Phil Williams, Rockytop Gardens.

Work is continuing on the Bulletin Index project, although interrupted by bloom season, as well as the attempt to collect all of the Larry Harder slide collection. Bob Hollingworth, (Siberian), Tom Gormley (Median 50<sup>th</sup> issue) have sent the slides which they held and Jerry Hoke has indicated that he has 6 boxes of slides ranging from 27 to 34 pounds each ready to be shipped. There is one other source that is being pursued which when received should complete the collection.

It is assumed that the Jerry Hoke group is a collection of all types of plant subjects in which Larry was interested. That will require searching through each box to separate out the iris. The question then is "Should the Library separate out the others into separate groups and make an attempt to contact the representative societies as to their possible interest?".

Respectfully submitted,

Dave Silverberg  
A.I.S. Librarian
